

## Providing Safety and Security with Personal Emergency Response Systems

Founded in 1930, Guardian is a recognized leader in Personal Emergency Response Systems (PERS) and monitoring programs. At the time of an emergency, a Guardian Care Representative assesses your situation and calls for appropriate assistance. Most importantly, we remain in communication with you until help arrives, giving you the peace of mind you need at all times .

Our comprehensive lineup of systems all offer a water-resistant pendant and battery backup in the event of a power outage. Your Guardian representative will help you select the product that best meets your individual needs.

### Landline Systems

#### Basic Home PERS

Our most popular system.

#### Caregiver Connect PERS

Button on base connects user to caregiver or family member. Optional two-way voice pendant.

### Cellular Systems

#### Advanced Cellular PERS
